

/hai — Week 2 Report

Sai Pranavi Jeedigunta | Mycroft Project 29

July 6 — July 12, 2026

Hours Log

Date	Activity	Hours
Mon July 6	Mycroft team meeting, HR emails, agreement update	3.0
Tue July 7	HR follow-up, agreement correction	0.5
Wed July 8	Agreement signed, Welcome email, Unique ID 241	1.0
Thu July 9	SEVP update, /hai Week 1 report, meeting notes review, email to Shradha, GitHub research	5.5
Sat July 11	Eddy formatting review, article fixes, Substack research, GitHub structure review, Mycroft article reading	9.5
Total		20.0

Accomplishments

1. Attended Monday Mycroft team meeting and deepened project understanding

Attended the weekly sprint kickoff, confirmed Project 29 assignment with Shradha, reviewed the team's sprint tracker format, and gained context on how other Fellows structure their contributions. Project 29 confirmed as currently unassigned with no active Fellow — clean start.

2. Completed full compliance and onboarding

Volunteer agreement countersigned by Professor Brown, SEVP portal updated with Humanitarians AI Inc. as OPT employer, Unique ID 241 assigned, Google Sheet access granted. All compliance items closed.

3. Drafted and fully cleared first Mycroft Substack article

Wrote 'The Scanner That Cannot Read' — processed through CRITIQA for peer review and Eddy for Substack formatting. All structural, editorial, SEO, and ethical checks passed. Article is publish-ready pending writer access to the Mycroft Substack.

Struggle Documentation

The hardest thing this week was figuring out how to publish on the Mycroft Substack. Shradha sent a subscriber invite rather than a writer invite — two different access levels in Substack. This was not immediately obvious and required research to diagnose. The article is fully ready but publishing is blocked on a simple settings change Shradha needs to make. This is a coordination gap, not a content gap.

Tier Justification

Tier 1 — AI Fluency: Used Eddy formatter for Substack optimization across seven stages of review. Applied CRITIQ peer review to validate argumentative structure.

Tier 4 — Judgment and Supervision: Diagnosed the Substack access problem independently — identified the difference between subscriber and writer access, confirmed the diagnosis against Substack account settings, and identified the correct resolution path without escalating prematurely.

Tier 3 — Social and Ethical: Navigated team onboarding as a new Fellow, communicated proactively with Shradha about project access gaps, maintained professional communication throughout a week with multiple administrative blockers.

Unresolved

- Substack writer access not yet granted — article publish-ready but blocked
- Project 29 codebase access not yet granted — Humanitariansai org repo requires Shradha to add as collaborator
- Gru SDD not yet run — waiting on codebase access before scoping
- Friday meeting did not happen — some questions from email to Shradha still unanswered

Next Steps — Week 3

- Monday meeting — ask Shradha for writer access to Mycroft Substack and collaborator access to Humanitariansai org repo at the start of the call
- Publish article — immediately once writer access is granted
- Begin codebase review — once repo access is granted, review existing Project 29 code to understand current state and confirm hardening scope
- Run Gru — after codebase review and scope confirmation with Shradha
- Update Google Sheet — add Week 1 and Week 2 rows with Substack link once published

Compliance Notes

Item	Status
Volunteer agreement	Signed and countersigned — June 29 to July 31, 2026
SEVP portal	Updated — Humanitarians AI Inc. registered June 29, 2026
Unique ID	241
Unemployment days used	Approximately 11 of 90 allowed
RENEWAL DEADLINE	July 24, 2026 — 13 days away — action required
